Methodological note

In January 2019 we implemented some methodological changes regarding the import price indices such as weights, the list of products and reporting units.

The weights are based on the customs declarations (Extrastat) and statistical forms (Intrastat) covered by external trade statistics for 2017. For the mentioned recalculation in 2017 the index December 2018 / Ø2017 was used.

The sample of reporting units includes 432 enterprises which report monthly for 1,779 products.

Detailed data

Detailed data and time series are available on the [SI-STAT data portal](#), which enables simple browsing and exporting of data in various formats. Registered users have the possibility to store tables for later browsing and to sign up to be informed when data are updated.
