

Improved economic sentiment in July 2019

Sentiment indicator, Slovenia, July 2019

Economic sentiment improved at the monthly level and deteriorated at the annual level. It remains well above the long-term average.

Improved economic sentiment at the monthly level

In July 2019 the value of the sentiment indicator (at 6.9 percentage points – p.p.) increased by 1.4 p.p. compared to June (at 5.5 p.p.).

The monthly increase in the sentiment indicator was influenced by the manufacturing confidence indicator (by 1.4 p.p.), while the confidence indicators in other sectors of the economy did not have any substantial influence.

Sentiment indicator deteriorated at the annual level

The sentiment indicator decreased by 3.7 p.p. at the annual level.

This decrease was influenced mostly by the manufacturing confidence indicator (by 2.1 p.p.), while other confidence indicators had a more marginal influence. Confidence indicators in services, construction and among consumers also had a negative influence (by 0.7, 0.7 and 0.6 p.p., respectively), while the confidence indicator in retail trade had a positive influence (by 0.3 p.p.).

Methodological note

Some totals and subtractions do not add up due to rounding.

The sentiment indicator is the weighted average of the confidence indicators in manufacturing, retail trade, construction, services and the consumer confidence indicator.

Data are seasonally adjusted.

In January 2016, methodological changes were implemented in the Consumer Survey and these can have an impact on the value of the sentiment indicator.

Detailed data

Detailed data and time series are available on the [SI-STAT data portal](#), which enables simple browsing and exporting of data in various formats. Registered users have the possibility to store tables for later browsing and to sign up to be informed when data are updated.
