

26 junij 2020
final data

In 2019, for the fifth consecutive year marine fishing was lower than in the previous year

Marine fishing, Slovenia, 2019

In 2019 the catch (landing) of fishery products was 4.4% lower than in 2018, but its total purchase value increased by about 2%.

In the structure of marine fishing (landing) less fresh fish products and less molluscs than in 2018

According to the data of the Ministry of Agriculture, Forestry and Food, in 2019 Slovene fishermen caught (landed) about 121 tons of fresh fish products. The total mass of caught marine animals (or landed fish products) was 4.4% lower than in 2018.

About 75% of the total fish products caught (landed) in 2019 were fresh fish products; crustaceans represented 1% and molluscs 24%. The share of molluscs in the total catch (landing) was the same as in 2018. Musky octopus dominated among the molluscs.

Marine catch (landing) declined for the fifth consecutive year. Interestingly, the total catch weight in 2019 was 1% lower than the average monthly catch in 2002.

Total purchase value of landing in 2019 about 2% higher than in 2018

Considering the purchase prices of products (without VAT), the Fisheries Research Institute of Slovenia estimates that the value of fish products landed in 2019 was about EUR 877,412 or 2% higher than the purchase value of landing in 2018. The highest average prices were achieved by fresh Turbot, Midsized squid, Shi drum, Angler, Black seabream (EUR 16 per kilogram or more).

Other data

In the SiStat Database also the estimated data on discards in 2019 are published.

Methodological note

Because the caught marine animals are not processed on the Slovene fishing vessels (they are not eviscerated, filleted, iced, etc.), the data on landing are at the same time the data on marine fishing.

Detailed data

 Detailed data and time series are available on the [SI-STAT data portal](#), which enables simple browsing and exporting of data in various formats. Registered users have the possibility to store tables for later browsing and to sign up to be informed when data are updated.
